Dear Homstar,

Re: internship program position

I am writing to apply for the Summer internship program position at Homstar, which was advertised online at Seek. I have two working experience and get a Computer Science bachelor degree in US, and I'm pursuing IT master degree in UNSW.

I have enclosed my Resume to support my application. It shows that I would bring my fantastic experience and key skills to the position, including:

Experience:

In February 2017, I joined a Microsoft team in the Capstone program, and worked for a fantastic program which was using ML algorithm to predict employ retention and thereby integrate the resulting ML algorithms within Dynamics 365 for Human Resources application. My position was C# web front end developer. This has given me a range of practical capabilities that will meet the needs of this role, like HTML5, CSS and JS.

In September 2017, I was hired by C&C GLOBAL EXPRESS Company in Melbourne. My position was front end web developer, and I also worked for Android side. The project is for building a Goods Management System including Web, Android, IOS. This working experience has given me a opportunity to touch how the "real world" developer jobs work. From this working experience, I have learned React Framework, Java Restful Server and Some skills in Android side. As a part time job, I'm still working for front end side by using AntDesign based on React framework.

Skills:

From my previous studies and experience, I got several skills, like Java, C#, JavaScript, python, and Machine Learning. Also I'm familiar with some frameworks: ASP.NET MVC, SpringMVC, React.

I really want to learn some new skills, likes PHP and Node.js from you. I can bring my passion and experience to you, and I believe I can get a fantastic experience there if I get this opportunity.

I would enjoy having the opportunity to talk with you more about this position.

Thank you for considering my application. I look forward to hearing from you.

Yours sincerely,

Kai Yao
